Establishing a
strong foundation
of trust is key

with our Employees,
Partners and most
importantly our
Customers.

ABOUT US

Nasma is a technology based IT and Communications Solutions Provider and Systems Integrator. Nasma is principally involved in providing integrated IT and communication solutions to various industries including Energy, Oil and Gas, Utilities, Telecommunications, Government, Banking and Finance, Industrial and Health Care. Nasma offers its clients a comprehensive range of advanced technology IT and communication solutions to suit various application and requirements involving the following:

- Telecommunication Backbone Systems and Infrastructure
- Networking Infrastructure & Security, Video, Voice, Data and Specialized Systems. Data Centre, Site and Power.
- Servers, Storage, Converged/ Dynamic/Virtualized Infrastructure.
- Audio Visual Solution and Collaborative Working Environment (CWE).
- Safety & Security Solutions.
- Software Applications.

In addition, Nasma, with its partners, have systems and products that can provide solutions and services in Process Control and Management for Oil & Gas and Energy markets. Nasma holds a team of highly skilled and motivated people with a broad range of experiences, focused on providing cost effective, innovative and reliable solutions engineered and supported locally. Nasma is committed to its customers and intends to be the leading solution provider and systems integrator providing advanced and cost effective solutions, engineered and supported locally.

MISSION

To be the leading provider and high-integrity partner for IT and communications solutions engineered and supported locally enabling to achieve organisations vision and goals.

VISION

To be the leading solution provider and systems integration and go beyond by delivering the highest value to our customers, employees, suppliers, and shareholders, providing innovative, advanced and appropriate solutions, enabling organisations to deliver their business goals and building long-term relationships based on mutual trust and respect.

CORE VALUES

Teamwork We work as one team in a collaborative environment. We know that everything accomplished relies on the skills, integrity, commitment and dedication of our employees.

Effective People

Right people doing the right job. We offer challenging, fair, and rewarding employment for our employees and set high expectations for performance. We seek to create an environment where people become dynamic, creative and can make a difference allowing them to realise their full potential.

Honesty & Sincerity

We do what we say we will do. Everything we do reflects a commitment to the highest standards of personal and corporate ethics.

Rewarding Relationships

We believe in developing & adopting long term partnerships; focusing on creating values and trust by understanding the fact that relationship building is a process not an event.

Accountability

Taking ownership and responsibility. We understand your requirement and deliver high quality service by leveraging the resources and know-how of our business.

IT & Networking

Nasma IT & Networking Business Unit builds Integrated IT Infrastructure, Telecom Networks and provides the security in and around them from wired and wireless infrastructures in your buildings and campuses, up to optical and virtual fiber solutions to link your branches. We help you deliver end-to-end communications, delivering voice, video and data allowing your business users collaborate closely across geographically spread locations; we can help you secure such communications with leading edge products from select partners in the field.

Network computing and IT Infrastructure continues to evolve the methods of working IT systems that can bring dramatic improvements in productivity by transforming industries and creating opportunities for entirely new market segments. Nasma has built a cluster of world class Consultants, architects and project managers to offer relevant consulting, integration, deployment and network support. We are therefore able to deliver large, complex, mission critical Emerging Network Technologies and IT infrastructure solutions.

Our products and services include:

- Integrated IT Infrastructure (Servers, Storage, Virtualization, Hyper Convergence, Data Management, backup technology, DR).
- Network Infrastructure (Routing, Switching, Wi-Fi, NFV, Load balancer, data centre switching, WAN optimization).
- Security and Mobility (Firewalls, NGFW, End points security, Application filters, PAM, BYOD, SIEM).
- Unified Collaboration (IP Telephony, Video, Conferencing, and Collaboration).

SOLUTIONS

Integrated IT Infrastructure

Being a leading systems integrator in the region, Nasma has partnered with market leaders like HP, CISCO, Huawei, DELL-EMC, NETAPP, COMMVAULT, VEEAM etc. for various cutting edge technologies that will provide customers with end to end solutions whilst keeping in mind future roadmap including industry compliances and eventually migration to cloud services. Systems are designed from ground up with new data center trends and reality in mind, offering the foundation for a number of popular infrastructure-as-a-service (IaaS) offerings, private cloud deployments, and enterprise applications. Nasma offers a complete portfolio of storage systems, NAS subsystems and content platforms to optimally consolidate your storage infrastructure and give you best-in-class availability and performance to meet the needs of your business applications. Data Systems allows customers to transform raw data into valuable information by making it more accessible and simpler to manage. Storage virtualization offers a central, virtualized platform for all data and information.

Network Infrastructure

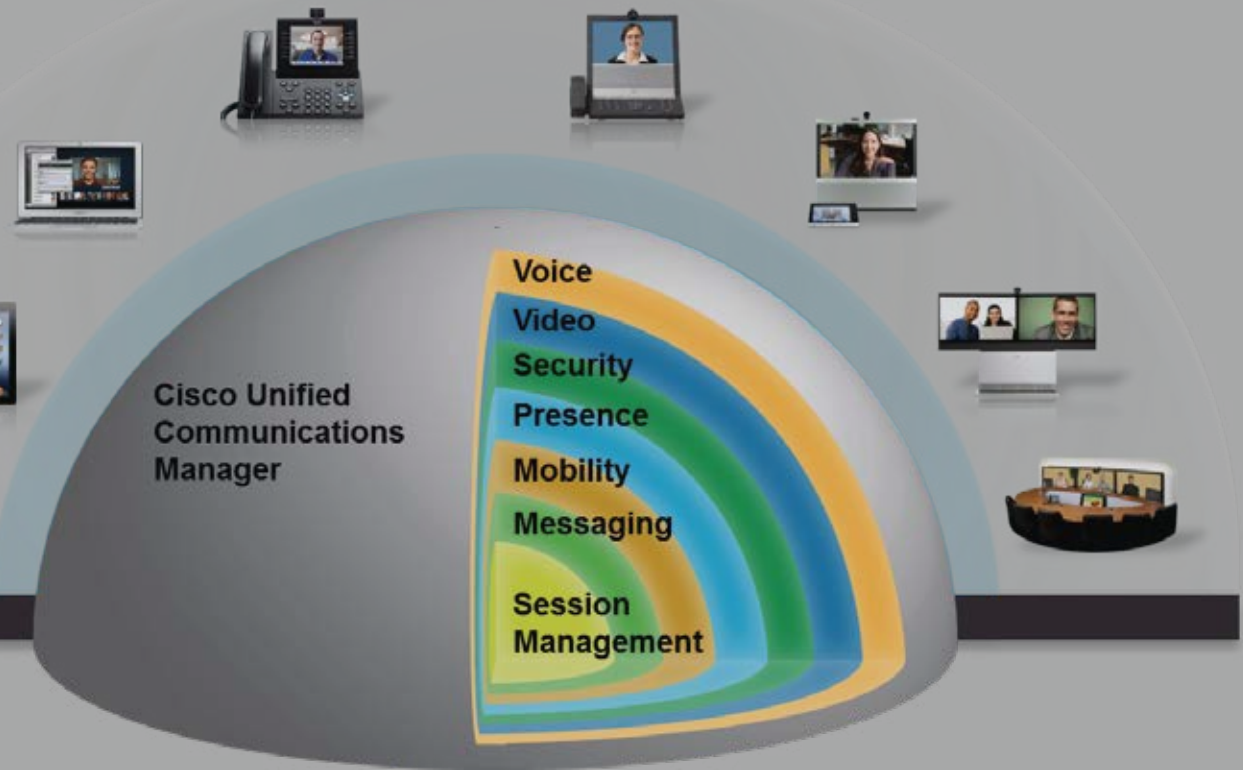

Routing, Switching, Mobility Scale your network performance and reliability with industry-leading network services, integrated service modules, powerful wireless solution and validated design guides. Nasma's portfolio of network infrastructure solutions is complete End-to-End solution for router, switches and mobility solutions neighboring areas. Nasma, Cisco Gold, HP Business, Huawei 3-Star CSP Silver, RUCKUS certified (to name a few), delivers world class routing platforms. Nasma portfolio of network switching start from basic access layer switch to multilayer core switching and high performance datacenter switches. Nasma has a varied range of consulting and implementation service and solutions involving Infrastructure Routing and Switching, Network Security, Data Center Network Service such as WAN Optimization and Accelerations, Video and Audio Conferencing, Unified Communications including IP Telephony and Contact Center Solutions, Intelligent/Smart Building Management System, etc.

Security and Mobility

Nasma's family of security products UTM, next generation firewalls (NGFW), intrusion prevention systems (IPS), web application firewall (WAF), Web Filtering solution, PAM, SIEM and wireless security delivers high performance and advanced protection from sophisticated threats while simplifying your network. Nasma is a partner of world leading vendors like Cisco, Fortinet, F5, Palo Alto, Checkpoint, WatchGuard, McAfee, One-Identity and more. Our diverse product line of complementary solutions enables businesses and governments to consolidate stand-alone products, embrace new technologies and pursue business opportunities while remaining secure. Nasma mobility solutions help businesses move beyond bring your own device (BYOD) access to establish a true enterprise mobility strategy.

Unified Collaboration Systems

Nasma unified collaboration solution deliver from basic IP telephony solution for SMB to large enterprises. We deal in unified communications, call-center, presence services, fax solution, call recording and billing solutions and much more to give our client high tech productive environment with freedom for connection from everywhere and any device. Stay connected and productive with messaging, presence, enterprise social, and IP telephony services. The performance of wired network and mobility of wireless solution are combine to get high performing, easy to use network along with IPT systems. The products are supported by high skilled staff and team of certified network professionals.

BUSINESS PARTNERS

PROJECT REFERENCES

CLIENT	BRIEF DESCRIPTION	CURRENT STATUS
Telecommunications Regulatory Authority (TRA)	Supply & Installation of Cisco Switching, UCS Servers, Storage, Video Conferencing & IPT Infrastructure.	Completed - 2015
Petroleum Development Oman	Design and construction supervisory services for IT Data Centre for OGDR.	Completed - 2015
Petroleum Development Oman	To deliver physical security and communication Design and architecture of PDO's entire routing network . This involves all of the nine regional areas and all of the PDO stations and to the control building of the project.	Completed - 2015
Ministry of Agriculture & Fisheries	Supply, Installation & Configuration of Cisco Networking Equipment for Head Quarter Data Center & more than 100 Branches in all over Oman.	Completed - 2016
Petroleum Development Oman	Supply, Installation & Configuration of Cisco Switching Infrastructure at Rabab Harweel Integrated Project (RHIP).	Completed - 2016
Galfar Engineering and Contracting	Supply, Installation & Configuration of Cisco Switching Infrastructure at Yibal Khuff (PDO).	Completed - 2016
Oman Electricity Transmission Company	Supply, Installation & Configuration of Cisco Switching, UCS Servers, Hitachi Storage & AMC 3 Years.	Completed - 2016
Ministry of Civil Services (MOCS)	Supply, Installation & Configuration of Cisco Switching Infrastructure.	Completed - 2016
Royal Oman Police	Supply of Cisco Catalyst 3800 Switches.	Completed - 2017

PROJECT REFERENCES

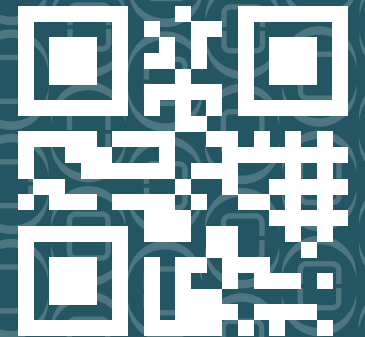

CLIENT	BRIEF DESCRIPTION	CURRENT STATUS
Arabian Industries	Supply & Installation of Network Equipment at AIP-Mabrouk Camp & PDO Telecom Facilities.	Completed - 2017
CCED	Supply of Cisco Switches, UCS Servers, Security Licenses & Smart-Net.	Completed - 2017
Arkan Majan	Supply, Installation & Configuration of Cisco IPT Solution.	Completed - 2017
Oman Gas Company	Supply, Installation & Configuration of Cisco ISE, WLAN, AMP, IP Phone, iMagical Infrastructure.	Completed - 2017
Royal Oman Police	Supply of Cisco Catalyst 3800 Switches.	Completed - 2017
Duqm Refinery	Annual Maintenance Contract of Cisco IPT Infrastructure (1 Year).	Completed - 2017
Tecnicas Reunidas	Supply, Installation & Configuration of Cisco Equipment.	Completed - 2018
Petroleum Development Oman	Supply, Installation & Configuration of Cisco Switches for LAN Infrastructure.	Completed - 2018
BP Exploration (Epsilon) Limited (Oman)	Annual Maintenance Contract of Cisco IPT Infrastructure (3 Years).	Completed - 2019
Redline Communications	Supply & Installation of Wireless Network - CCED.	Completed - 2019

PROJECT REFERENCES

CLIENT	BRIEF DESCRIPTION	CURRENT STATUS
State General Reserve Fund	Supply, Installation & Configuration of DR Automation & Replication Monitoring System Project.	Completed - 2019
Galfar Engineering and Contracting	Supply, Installation & Configuration of Cisco Networking Equipment at MC13 - Oman New Airport Catering Building.	Completed - 2019
Galfar Engineering and Contracting	Supply & Installation of SMA TV (PDO Camp)	Completed - 2020
Ministry of Agriculture & Fisheries	Supplying & Installation of Network Equipment	Completed - 2020
Petroleum Development Oman	Enterprise Data Quality Consultant (Oracle)	Completed - 2021
BP Exploration (Epsilon) Limited (Oman)	Upstream Field Network Modernization Project for Oman (UFNM)	Completed - 2021
BP Exploration (Epsilon) Limited (Oman)	The project involves providing Procurement, build of cabinets, integrated Factory acceptance testing and Commissioning of the systems to Upgrade Field Wi-Fi Hardware for BP Khazzan. The project includes procurement, migration\decommissioning of old Wi-Fi, new network infrastructure for Wi-Fi, network access control for Wi-Fi, installation, testing and commissioning. Project spans across 22 sites and includes more than 400 Access points (indoor and outdoor), network switches (access and core) and network access control (Clear pass).	Completed - 2021
Arkan Majan Internation LLC	Supply & Services of HP Servers for Canyon View Resort	Completed - 2024
